C109 Skro Hyde ^{Hyde} - please add to record

1 I am opposed to the proposed Yucca Mnt. Nuclear waste sight in Nevada and the waste sight at Carlsbad Caverns, N.M., as are most of the residents of Nevada, N.M. & Colorado.

I don't think there are any quick solutions to the nuclear waste problem that our elected officials have dumped on us. Not only are these sights easily labeled as faulty, or disasters waiting to happen, they hugely increase the chances of public and environmental contamination by transporting high level nuclear waste all across America. I believe our only safe solution for the present is a temporary one. ~~Let's~~ let's keep the waste where it is and create storage containers around it until we have the technology to deal with it safely. Any other solution is a product of haste, greed, and a false belief instilled by the U.S. govt. that nuclear waste is easily dealt with and disposed of.
